Project Name: Bus Ticket Booking System.

Introduction:

Bus Ticket Booking System is an automated system for purchasing online/counter bus tickets.A Bus Ticket Booking System manage all type of action that related to purchasing a ticket.If you need to purchase or cancel a ticket then you use the system.

Objective:

The bus ticket reservation system is currently manually maintaining the process of the project transport company which is a very time consuming process. This is related to ticket booking and transportation maintenance in the transport industry, so it becomes a very tedious task for the ticket booking transporter to look after these details to complete the work on time.We are trying to make this Bus ticket booking System as easy as possible with all facility.It helps user to puschase ticket easily and it's management system helps company to manage all think in one application.

➢ This system will lead to increase in the ticket booking efficiency.
➢ This system project is made as user friendly as possible so that any one can use it with little knowledge of system computers.
➢ We provide up to date information that is not possible manually.

A Bus ticket booking system has two panel User panel and Admin panel.The two panel has several type of option.

User panel Option:

1.Login/Registration – A user can registration in this system and login using this option.

2.Search Ticket Option – A user can search ticket by putting date,starting and destination station.

3.Payment Option – If a user select a seat then he must be pay for the seat by using this option.

4.Ticket Download option – If a user pay for a seat then he get a ticket and download it from here.

5.Cancel Ticket option – A user easily cancel a ticket by using this option.

Admin Panel Option:

1.Login option – Using this option a admin can login into this application.

2. Manage Bus & Schedule – A admin can insert,delete,update bus information and manage bus scheduling.

3. Manage Payment – Here admin can see total selling ticket and total payment.

4. Manage Bus ticket – A customer can buy ticket through counter then a admin book a ticket using this option for customer.
